Dear Brothers, Sisters and Friends,

A Chinese common saying, " it is summer when the day of Duanwu Festival arrives." As a scientific point of view, the summer solstice starts on June 21. In the state, I think the summer begins when Memorial Day arrives because many people plan their summer vacations from Memorial Day. You might have a different thought about when the summer begins, which they are all fine. Since the daylight is longer, are you working hard on your job and neglect what are surrounding you? Have you looked up the sky lately to see the Saturn, the Big Dipper, and all other stars God have created for you and me? We are easily neglect the nature beauty that surrounds us and spend more time on Internet, iPhone, and works. " But ask the animals, and they will teach you, or the birds in the sky, and they will tell you; or speak to the earth, and it will teach you, or let the fish in the sea inform you. Which of all these does not know that the hand of the Lord has done this? In his hand is the life of every creature and the breath of all mankind." – Job 12:7-10

My brothers, sisters, and friends, you may not need to plan a trip to see the wonders of nature. Just look up the sky. You will see it, and the stars will tell you stories to refresh you and draw you near to God.
